

# Gasoline Powered Garden Scarifier

This compact scarifier features a gasoline-powered engine and rotating tines. Adjustable depth control and a foldable handle enhance usability and storage.

## Product Overview

### Compact Power for Soil Management

This gasoline-powered garden scarifier is specifically engineered for efficiency in hills, mountains, and small plots of land. Featuring a front-wheel-drive design, it provides excellent maneuverability for tasks like soil loosening, cultivating, and weeding. Its lightweight, compact structure makes it an ideal solution for orchard management, tea gardens, and greenhouses, ensuring high productivity with low fuel consumption.

## Key Features

### Operational Performance

#### 1 Front-wheel

Drive Type

### Suitable Environments

Sandy Land, Orchards, Tea Gardens, Greenhouses, Tobacco Fields

## Technical Details

### Design Advantages

- Lightweight and compact for easy handling
- Simple mechanical structure for low maintenance
- Convenient operation with foldable handle
- High production efficiency
- Low fuel consumption

### Soil Processing Abilities

- Loosening compacted soil
- Efficient weed removal
- Stubble coverage
- Preparation for seedbeds
- Soil aeration
