

Gasoline Powered Garden Tiller

This garden tiller is a powerful machine designed for cultivating soil in gardens and small farms. It features rotating tines that break up and aerate the soil, preparing it for planting.

Overview

High-Performance Soil Cultivation

This gasoline-powered garden tiller is designed for efficient soil cultivation in gardens and small farming plots. Featuring a reliable 196cc four-stroke engine, it provides the necessary power to break up and aerate various soil types. With adjustable working widths and precise depth control, this machine is an ideal solution for preparing seedbeds, incorporating fertilizers, and effective weed management.

Engine Specifications

Maximum Power

6.5 HP

Max Power

3600 r/min

Rated Speed

Engine Displacement	196 cc
Start Mode	Recoil
Fuel Tank Capacity	3.6 L

Performance

Working Width Options

- 600
- 700
- 800

Engine Type

4-Stroke • Air-Cooled • Gasoline

Working Depth	150 mm
