

# Gasoline Powered Garden Tiller

This gasoline-powered tiller is designed for garden and landscaping. It features adjustable tilling depth and forward-rotating tines for efficient soil preparation.

## Overview

### Efficient Soil Preparation

This gasoline-powered tiller and cultivator is engineered for effective garden and landscaping maintenance. Featuring a reliable four-stroke engine and forward-rotating tines, it streamlines soil preparation for small to medium-sized plots. The design prioritizes user convenience with adjustable tilling depth, a front wheel for maneuverability, and a foldable handle for compact storage.

## Technical Specifications

Engine Type	Four-stroke gasoline engine
Frame Material	Durable steel

## Features

Key Features	Adjustable tilling depth, Forward-rotating tines, Foldable handle, Front wheel for maneuverability
--------------	--

## Usage

### Application Suitability

Gardening • Landscaping • Small-to-medium plots
