

Gasoline Powered Garden Tiller

This gasoline powered garden tiller is designed for tilling and cultivating soil in gardens. It features a gasoline engine and rotating tines to efficiently churn the soil, creating an aerated surface for planting.

Product Overview

Compact Power for Soil Preparation

This gasoline-powered garden tiller is a robust tool designed for efficient soil cultivation in small to medium-sized gardens. Equipped with a reliable 4-stroke engine and adjustable tilling capabilities, it effectively breaks up compacted soil to create ideal seedbeds. Its ergonomic, lightweight design ensures maneuverability and comfort, making it an excellent choice for both home gardeners and small-scale farmers seeking a convenient soil preparation solution.

Technical Specifications

Engine Type	4-stroke OHV
Power Source	Gasoline

Design & Features

Usability

Lightweight • Compact • Easy Maneuverability

Key Features

Adjustable Tilling Width, Adjustable Tilling Depth, Ergonomic Handles, Protective Debris Shield, Throttle Control

Application

Best For

- Small to medium-sized gardens
- Soil aeration
- Seedbed preparation
- Home gardening
- Small-scale farming
