

Gasoline Powered High Pressure Washer

This gasoline powered high pressure washer has a strong cleaning capacity and high cleaning efficiency. It is easy to use and operate, and provides strong safety features.

Overview

Heavy-Duty Cleaning Performance

This gasoline-powered high-pressure washer is engineered for demanding cleaning tasks in industrial, commercial, and residential environments. It combines a robust engine with a high-performance pump to deliver consistent cleaning power for stubborn grime and dirt. The unit features a durable, mobile frame design, ensuring it remains both reliable and easy to transport between job sites.

Performance Metrics

Operating Pressure

15 Mpa
Pressure

Flow Rate

13 L/min
Flow Rate

Technical Specifications

Engine Power Type	Gasoline
Engine Model Reference	170

Features

Key Features

- Robust gasoline engine
- High-pressure pump system
- Durable frame with wheels
- Multiple nozzle attachments
- Integrated detergent tank

Application

Intended Use	Industrial, Commercial, Residential
