

Gasoline Powered High Wheel Lawn Mower

This gasoline high wheel lawn mower is designed for tackling tough terrain and overgrown areas. Equipped with a powerful gasoline engine, it delivers reliable cutting performance.

Product Overview

High-Efficiency Gasoline Mowing Solution

This gasoline-powered high wheel lawn mower is engineered for both garden and agricultural applications, offering a compact and ultra-lightweight design. It features a high-performance engine optimized for excellent fuel economy without sacrificing cutting power. Designed with user ergonomics in mind, the mower includes an adjustable handle and speed settings, ensuring comfortable operation across diverse terrains.

Performance & Efficiency

Fuel Efficiency	Optimized oil saving performance
Engine Performance	Strong, high-efficiency operation

Design & Ergonomics

Design	Compact and ultra-lightweight
Handle Features	Ergonomic design with adjustable speed and height

Compliance & Standards

Regulatory Compliance	EPA, CARB, EURO-V, REACH, RoHS
-----------------------	--------------------------------

Usage

Common Applications

- Gardens
- Agriculture
