Product Overview

Professional Soil Cultivation

This gasoline-powered rotary tiller is engineered for reliable performance in greenhouses, orchards, and drylands. Featuring a high-performance engine and a lightweight aluminum alloy transmission box, it balances power with maneuverability. The belt-driven clutch system reduces mechanical shock, ensuring durability during intensive soil preparation and seedbed cultivation tasks.

Technical Specifications

Engine Displacement	212 cc
Transmission Box Material	Aluminum Alloy
Drive/Clutch System	Belt tensioned and clutched
Model Identifier	P1800

Applications

Ideal Environments	Greenhouses, Orchards, Drylands
