

Gasoline Powered Rotary Tiller

This gasoline powered rotary tiller is equipped with a WM168FB gasoline engine. The machine is known for its excellent function and performance in soil preparation.

Product Overview

Professional Soil Cultivation

This high-performance gasoline-powered rotary tiller is engineered for efficient soil preparation in gardens and small farms. Featuring a robust engine and hardened steel tines, the machine effortlessly breaks up compacted soil to improve aeration and moisture retention. Its ergonomic design and adjustable settings make it a versatile and reliable choice for professional agricultural maintenance.

Technical Specifications

Engine Model	WM168FB
Power Source	Gasoline

Key Features

Construction

Hardened Steel Tines • Durable Construction

Safety Equipment

Protective Shield, Emergency Shut-off Switch

Operational Capabilities

Adjustable Performance

- Adjustable tilling depth
- Adjustable tilling width
