

Gasoline Powered Shoulder Brush Cutter

This shoulder brush cutter is a powerful tool for clearing dense vegetation and maintaining landscapes. It features a high-performance gasoline engine and an ergonomic shoulder harness for comfortable operation.

Product Overview

High-Performance Vegetation Management

The CG411 shoulder-mounted brush cutter is engineered for demanding landscaping tasks, offering a robust gasoline engine suitable for clearing dense vegetation, weeds, and thick grass. Designed with an ergonomic harness and adjustable controls, this tool provides the maneuverability and comfort required for long-duration professional use. Its versatile cutting system supports both durable blades and nylon lines to handle a wide variety of terrain and vegetation density.

Technical Specifications

Model	CG411
