

Gasoline Powered Soil Tiller Cultivator

This agricultural machinery is designed for tilling and cultivating soil. It features a gasoline-powered engine, adjustable tilling depth, and durable metal tines for efficient soil preparation.

Product Overview

High-Efficiency Soil Preparation

This gasoline-powered soil tiller and cultivator is engineered for effective soil preparation in small to medium-sized gardens and fields. Featuring durable metal tines and adjustable tilling depth, it provides consistent performance for various agricultural tasks. The compact design and ergonomic handlebar ensure easy maneuverability and precise control for the operator.

Technical Specifications

Engine Type	Gasoline Powered
Model Identifier	Z-400
Ideal For	Small Gardens, Medium Fields, Soil Cultivation, Tilling

Design Features

Key Components

- Durable metal tines
- Adjustable tilling depth mechanism
- Compact chassis design

Control	Ergonomic Handlebar
