Gasoline Powered Water Pump

This self-priming centrifugal pump is powered by a gasoline engine. It is designed for agricultural applications such as irrigation, dewatering, and water transfer.

Product Overview

GP25 Petrol Pump Overview

The GP25 is a robust and efficient self-priming centrifugal water pump designed for demanding agricultural and construction environments. Powered by a reliable gasoline engine, this unit offers high performance and portability, making it ideal for irrigation, drainage, and general water transfer tasks in remote locations. Its sturdy construction ensures durability, while the easy-to-start engine provides a user-friendly experience for farmers and contractors.

Technical Specifications

Pump Type	Self-priming centrifugal
Power Source	Gasoline Engine

Key Features

Key Benefits

- High portability for remote locations
- Robust construction for demanding tasks
- Easy-to-start engine mechanism

Ideal Applications	Irrigation, Dewatering, Water Transfer, Agricultural Use
