

Gasoline Powered Water Pump

This gasoline-powered water pump is designed for efficient water transfer. It features a robust engine, durable pump housing and a portable frame.

Overview

High-Performance Gasoline Water Pump

The DKQD80-30 is a gasoline-powered water pump engineered for efficient water transfer across diverse applications, including irrigation, drainage, and construction. Built for reliability, it features a robust engine, durable pump housing, and a portable frame for easy transport on job sites. Designed for high-volume water displacement, it includes standard hose connections for rapid setup and a low-oil shutdown safety feature to protect the engine during operation.

Technical Specifications

Model Number	DKQD80-30
Hose Connection	DN-80

Features

Suitable Applications

- Agricultural Irrigation
- Water Drainage
- Construction Sites

Key Features	Low-oil shutdown, Portable frame, High-volume displacement, Durable housing
