

Gasoline Powered Water Pump for Irrigation and Construction

This gasoline water pump is designed for efficient water transfer in various applications. Its robust construction ensures durability and reliable performance.

Overview

High-Performance Gasoline Water Pump

This gasoline-powered water pump is engineered for efficient water transfer across demanding environments, including construction sites, agricultural irrigation, and emergency water removal. Built with a focus on durability and reliable performance, it features a self-priming mechanism and a robust impeller system. The unit is designed for portability and stability, ensuring ease of use and maintenance for professional operators.

Performance Metrics

Maximum Flow Rate

550 L/min

Max Flow

Maximum Head Lift 28 m

Maximum Suction Head 8 m

Technical Specifications

Suction & Discharge Port 50mm (2 inch)

Fuel Tank Capacity 3.6 L

Applications

Suitable Applications Irrigation, Construction, Emergency Water Removal

Key Features

Key Features

- Self-priming function
- Durable impeller construction
- User-friendly controls
- Portable and stable frame design
