

Gasoline Powered Wood Chipper Shredder

This gasoline-powered chipper/shredder efficiently processes yard waste. It features a powerful gasoline engine and a large hopper for easy feeding of branches and other materials.

Overview

High-Performance Wood Processing

This gasoline-powered chipper shredder is engineered for efficient yard waste management, capable of handling branches up to 2 inches in diameter. Powered by a robust 159cc OHV 4-stroke engine, it delivers consistent performance at 3600rpm, making it suitable for both residential and light commercial landscaping tasks. The unit is designed for portability and ease of use, featuring a reliable recoil starting system and a sturdy frame.

Performance Metrics

Chipping Capacity	50 mm
Blade Speed	2400 rpm
Blade Type	H Type

Engine Specifications

Max Output

5.5 HP

Max Output

Engine Type	OHV 4-stroke
Displacement	159 cc
Starting System	Recoil

Capacity & Fluids

Fuel Volume	1.2 L
Oil Volume	0.55 L
Fuel Type	Unleaded Gasoline

Logistics & Shipping

Container Loading

Container Type	Capacity (Units)
20' GP	76
40' GP	160
40' HP	201

Weights

- Gross Weight: 48kg
- Net Weight: 40kg
