

Gasoline Transfer Pump

This positive displacement pump is designed for pumping gasoline and similar fluids. The pump features a robust cast iron construction and flanged connections for secure piping.

Product Overview

Industrial Fluid Transfer Solution

This positive displacement pump is engineered for the reliable transfer of gasoline and similar volatile fluids in demanding industrial environments. Featuring a robust cast iron construction, it is designed to withstand rigorous use while maintaining consistent performance. The unit utilizes a rotary gear mechanism, ensuring efficient fluid movement and durability for long-term operational needs.

Technical Specifications

Pump Mechanism	Rotary Gear Pump
Housing Material	Cast Iron
Connection Type	Flanged
Suitable Applications	Gasoline Transfer, Industrial Fluid Handling, Fuel Management
