

Gasoline Vibrating Plate Compactor

This gasoline vibrating plate compactor is engineered for efficient soil compaction in construction and landscaping. It delivers high-frequency vibrations to consolidate granular materials, asphalt, and other surfaces effectively.

ADDITIONAL IMAGES

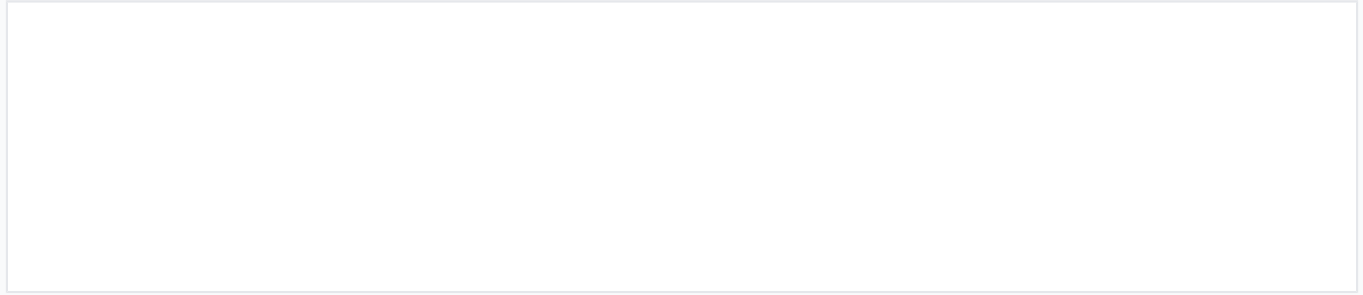

Overview

Professional Soil Compaction

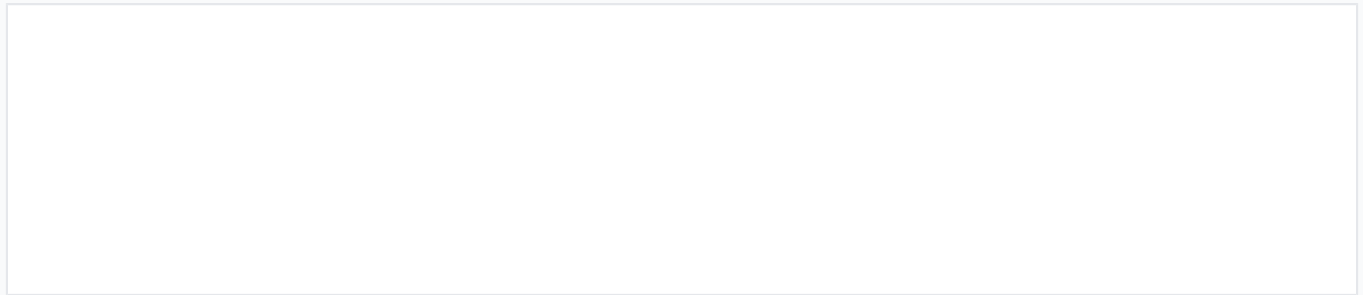

This high-frequency gasoline vibrating plate compactor is engineered for robust performance in construction and landscaping tasks. Featuring a durable thickened steel base plate and a reliable 196cc engine, it effectively consolidates granular materials, soil, and asphalt. Designed for efficiency and operator safety, it includes an integrated water tank for dust suppression and a foldable handle for convenient transport.

Technical Specifications

Engine Displacement	196 cc
Power Output	5 HP
Vibration Frequency	4500 vpm
Net Weight	90 kg
Compaction Depth	30 cm
Moving Speed	2.5 m/min
Base Plate Dimensions	58.5 x 46 cm
Engine Oil Limit	250 ml

Features

Key Advantages

- High-frequency vibration for efficient soil and asphalt compaction
- Thickened baseplate for anti-deformation and long service life
- Integrated detachable water tank for dust suppression
- Foldable handle and ground wheels for easy transportation
- Anti-slip handrail for enhanced operator safety

Certifications	CE, ISO 9001
