

Gasoline Water Pump

This self-priming centrifugal gasoline water pump is designed for efficient water transfer. It features a robust gasoline engine for reliable power and durable pump construction for long-lasting performance.

Overview

High-Performance Gasoline Water Pump

The SCWP-40G is a robust, self-priming centrifugal gasoline water pump engineered for reliable water transfer in demanding environments. Designed for efficiency, this unit features a powerful engine capable of handling high-volume flow rates, making it an ideal solution for agricultural irrigation, construction site dewatering, and emergency drainage. Its portable frame ensures easy setup and transport, providing professional-grade performance where you need it most.

Performance Specifications

Key Performance Indicators

96 m3/h

Flux

20 m

Lift

8 m

Suction

6.1 kW

Max Power

Technical Details

Engine Model	SC182F
Rated Rotation Speed	3600 rpm

Port and Connection

Inlet and Outlet Size	100mm / 100mm
-----------------------	---------------

Physical Dimensions

Dimensions (L x W x H)	700 x 475 x 590 mm
Net Weight	51.4 kg

Logistics

20FT Container Load	160 sets
---------------------	----------
