

Gasoline Water Transfer Pump

This gasoline water pump is designed for efficient water transfer in various applications. It features a robust engine for reliable performance and a durable pump housing for longevity.

Overview

High-Efficiency Water Transfer

This gasoline-powered water pump is engineered for reliable and efficient fluid transfer across a variety of demanding environments. Built with a robust engine and durable housing, it is perfectly suited for irrigation, construction site dewatering, and general water management tasks. The unit features a sturdy protective frame and user-friendly controls, ensuring both longevity and ease of operation for professional users.

Engine Specifications

Engine Displacement

211 cc

Displacement

Key Features

Design Highlights

- Robust gasoline engine
- Durable pump housing
- Sturdy protective frame
- User-friendly control interface

Primary Applications

Irrigation, Construction, Dewatering
