

Gear and Bearing Separator Puller Set

This pressure screw separator puller set is designed for removing gears, bearings, and other press-fit parts. It features a robust construction with high-strength steel components for durability and long life.

Product Overview

Professional Gear and Bearing Separator Set

This pressure screw separator puller set is specifically engineered for the efficient removal of gears, bearings, and various press-fit components. Constructed from high-strength steel, the set ensures maximum durability and reliability for demanding automotive, industrial, and mechanical repair environments. It includes an assortment of puller jaws, separator arms, and pressure screws to provide versatility across a wide range of maintenance tasks.

Technical Specifications

Separator Size	4 inches
Material	High-strength steel

Usage & Application

Applications

- Automotive repair
- Industrial machinery maintenance
- General mechanical tasks

Key Features

Durable Construction • Versatile Pulling Options • Organized Carrying Case
