

Geared DC Pump Motor

This compact motor is designed for fluid transfer applications. It features a clear plastic pump head with multiple ports and bearings for efficient operation.

Product Overview

Compact Geared DC Pump Motor

This compact geared DC motor is engineered for precise fluid transfer applications. Featuring a robust cylindrical metal housing and an integrated white plastic gear assembly, it offers reliable performance for systems requiring consistent fluid movement. The unit includes a clear plastic pump head with multiple ports, making it an ideal solution for specialized fluid control tasks.

Technical Specifications

Motor Type	Geared DC Motor
Primary Application	Fluid Transfer, Fluid Control

Construction

Key Components

- Armature windings
- Plastic gear assembly
- Multi-port pump head
- Integrated bearings

Housing Material	Metal
Pump Head Material	Clear Plastic
