

Gel Nail Polish Curing Lamp

This compact UV nail lamp is designed for curing gel nail polish. It features a rectangular housing with a hand placement opening and emits UV light for quick and effective drying of nail enhancements.

Product Overview

Professional Nail Curing Performance

Achieve professional salon results in minutes with this highly versatile UV curing lamp. Designed for a wide array of applications, it supports UV gel polishes, 3D prints, UV jewelry resin, and various extension gels. The integrated cooling fan ensures a comfortable user experience during operation, while the LED screen provides clear recognition for precise control.

Technical Specifications

Core Performance Metrics

9 W

Power Output

365 nm

Wavelength

Voltage Compatibility

110/220V, 50/60Hz

Compatibility & Features

Key Features

- Integrated cooling fan for comfort
- LED display screen
- ABS outer shell construction
- Wavelength optimized for diverse curing needs

Supported Materials
