

General Hardware Accessories

These are general hardware accessories. They serve various construction, repair, and assembly applications.

Product Overview

General Hardware Accessories

These general hardware accessories are designed to meet the rigorous demands of professional assembly and construction environments. Built for durability and consistent performance, they provide essential support for various mechanical and structural applications. Their versatile design ensures compatibility with standard systems, making them a reliable choice for maintenance, repair, and manufacturing projects.

Technical Specifications

Surface Treatment

Corrosion Resistant • Zinc Plated • Polished

Material

High-grade industrial metal alloy

Compliance Standards

ISO 9001, CE Certified, RoHS Compliant

Performance Metrics

Performance Highlights

500 MPa

Tensile Strength

120 °C

Operating Temp Max

Usage & Application

Recommended Applications

- Industrial Machinery Assembly
- Construction Frameworks
- Automotive Repair
- Furniture Manufacturing
