

General Purpose 1.5V Carbon-Zinc Battery

This is a general purpose 1.5V carbon-zinc battery. It is designed for low-drain devices, providing reliable power for everyday use.

Overview

Reliable Power for Everyday Devices

These 1.5V carbon-zinc batteries are designed as a dependable and economical power solution for a variety of low-drain household electronics. Engineered for versatility, they are completely mercury and cadmium-free, ensuring a safer choice for standard consumer applications. They provide consistent performance for devices such as remote controls, wall clocks, and portable radios.

Technical Specifications

Nominal Voltage	1.5 V
Battery Chemistry	Carbon-Zinc
Model Designation	R14P / UM-2

Features & Compliance

Environmental Compliance
Mercury Free • Cadmium Free

Recommended Applications

- Remote Controls
- Clocks
- Radios
- Low-drain devices

Performance Metrics

Performance Highlights

1.5 V Voltage	0 mg Mercury Content
