

General Purpose Diesel Engine

This diesel engine is suitable for industrial, agricultural, and marine applications. It can power irrigation pumps, sprayers, threshers, and light-type transport vehicles.

Overview

Robust Industrial Power

This general-purpose diesel engine is engineered for reliability and high performance across a variety of industrial and machinery applications. Its durable construction ensures longevity even in demanding environments, while the compact design allows for versatile integration. Designed for efficiency, it offers low maintenance requirements and easy starting capabilities, making it an ideal power source for generators, water pumps, and agricultural equipment.

Technical Specifications

Fuel Type	Diesel
Model Series	F400

Features

Key Features	Easy Starting, Low Maintenance, Compact Design, Emission Compliant
--------------	--

Applications

Suitable Applications

- Generators
- Water Pumps
- Agricultural Machinery
