

Geometric Patterned Serving Plate

This large serving plate features a geometric pattern across its surface. Encased in a metallic ring, it is designed for serving fruits or displaying decorative items.

Product Overview

Elegant Geometric Serving Solution

This large-format fruit plate combines sophisticated design with practical utility. Featuring a complex, repeating geometric pattern of diamond and star shapes, it serves as an aesthetically pleasing centerpiece for any dining or hospitality setting. The integrated metallic outer ring provides both structural support and a refined, finished edge, ensuring durability for professional use.
