

Gigabit Ethernet Network Switch

This network switch features eight 10/100/1000 Mbps Gigabit Ethernet ports. It supports auto-negotiation and auto-MDI/MDIX, and has a compact, fanless design.

Product Overview

High-Performance Connectivity

The 8-Port Gigabit Ethernet Switch is a high-performance network solution engineered for small to medium-sized business environments. It delivers eight 10/100/1000 Mbps ports to ensure rapid and reliable data transfer for critical network infrastructure. With its compact, fanless design, it provides silent operation and flexible deployment options for offices, servers, and printing stations.

Technical Specifications

Supported Networking Standards

- Auto-negotiation
- Auto-MDI/MDIX

Total Ethernet Ports	8
Data Transfer Speed	10 Mbps, 100 Mbps, 1000 Mbps
