

Gigabit Layer 3 Network Switch

This gigabit switch is a next-generation Layer 2 and Layer 3 device developed for service providers and enterprise networks. It provides a large switching capacity and high density GE ports to implement 10Gbit/s upstream transmissions.

Overview

Enterprise-Grade Networking

This high-performance Layer 3 Gigabit network switch is engineered to meet the demands of modern enterprise environments. It provides robust connectivity through multiple Gigabit Ethernet ports and delivers advanced routing capabilities for efficient traffic management. Designed for scalability and reliability, it includes comprehensive security features to ensure network integrity and unauthorized access protection.

Technical Specifications

Key Capabilities

- Advanced routing protocols
- Enterprise-grade traffic management
- Robust security features
- Scalable infrastructure support
- Flexible management interfaces

Switching Layer	Layer 3
Port Type	Gigabit Ethernet

Compliance & Standards

Certifications

TÜV Rheinland • ISO • CE • SGS • CCC
