

Glass Beverage Bottle Mold

Precision-engineered mold designed for manufacturing glass beverage bottles. Crafted from durable metal, this two-part mold ensures accurate bottle formation.

Product Overview

Precision Glass Beverage Bottle Mold

This precision-engineered mold is specifically designed for the high-volume manufacturing of glass beverage bottles. Crafted from durable, high-quality metal, the two-part assembly ensures consistent and accurate bottle formation during production cycles. It features intricate detailing capabilities, allowing for the precise application of logos or custom designs directly onto the bottle surface.

Technical Specifications

Included Components

- Two-part outer mold
- Core pin for internal cavity
- Reference bottle sample

Design Features

Logo Embossing • Intricate Detailing • Precision Cavity

Mold Configuration

Two-part mold with core pin

Construction Material

Durable metal

Industry Suitability

Beverage Industry, High-Volume Production, Soft Drink Packaging
