Product Overview

High-Efficiency Glass LED Tube

This glass body LED tube is designed as a high-performance, energy-efficient replacement for traditional fluorescent lighting. Its durable glass construction ensures optimal light transmission and uniform, flicker-free illumination across residential, commercial, and industrial settings. By reducing energy consumption and maintenance needs, this tube offers a sustainable and cost-effective lighting solution that is free from hazardous substances like mercury.

Key Features

Key Benefits

- Energy-efficient replacement for fluorescent tubes
- Durable glass body for enhanced light transmission
- Long lifespan reduces maintenance costs
- Mercury-free and environmentally friendly
- Flicker-free, uniform illumination

Applications

Residential, Commercial, Industrial

Technical Specifications

Installation

Compatible with standard lighting fixtures

Housing Material

Glass
