

Glass Edge Grinding Diamond Wheel Set

This set is designed for glass edge grinding machines. It includes diamond grinding wheels for edge finishing and tools for creating holes and bevels.

Product Overview

Professional Glass Processing Solutions

This comprehensive set of diamond grinding wheels and bits is designed for high-precision glass processing applications. The collection includes specialized tools for linear edge grinding, hypotenuse edge finishing, and bilateral edge grinding, compatible with both domestic and imported machinery. With a mix of coarse and fine grit options, this set provides a complete solution for everything from initial coarse grinding to the final fine polishing process.

Diamond Bits and Core Drills

Available Grit Sizes	60#, 240#
Diameter	4 mm

Diamond Grinding Wheels

Resin Wheel Grit	120#, 600#
Diameter Range	100 mm - 200 mm

Compatibility

Supported Machinery

- Linear edge grinding machines
- Linear hypotenuse edge grinding machines
- Bilateral edge grinding machines
- Abnormity edge grinding machines

Specialized Tools

Cylindrical Wheel Usage	Optical glass lenses, plastic milling, and hole drilling
