

# Glass Edge Grinding Machine

This machine is applicable to domestic and imported glass linear edge grinding machines, glass linear hypotenuse edge grinding machines, and glass abnormality edge grinding machines. Its shape forms a cupcake bowl, but it can be customized according to specific customer needs.

## Product Overview

### Precision Glass Grinding Solutions

This high-performance grinding wheel is designed for use with both domestic and imported glass edge grinding machinery, including linear, hypotenuse, and abnormality edge grinders. Engineered for durability and efficiency, these components are suitable for processing optical glass, crystal handicrafts, and furniture stone. With a specialized cupcake bowl shape, these wheels deliver consistent results across various industrial glass finishing applications.

## Technical Specifications

### Available Dimensions

Diameter (mm)	Thickness (mm)	Bore (mm)
100	8	6
100	10	8
150	6	10
150	8	8

### Available Grit Sizes

80#, 320#

## Compatibility

### Compatible Machinery

- Linear edge grinding machines
- Linear hypotenuse edge grinding machines
- Abnormality edge grinding machines

## Product Features

### Available Product Series

King Kong Wheel • Resin Wheel • 10S Polishing Wheel • BK Polishing Wheel • BD Polishing Wheel • 905 Series Polishing Wheel

### Material Suitability

Optical Glass, Crystal Handicrafts, Furniture Stone
