

# Glass Edge Grinding Polishing Wheel

This polishing wheel is used for fine grinding and polishing on glass edge grinding machines. It can be customized according to specific customer needs.

## Product Overview

### Professional Glass Edge Processing

This high-performance grinding and polishing wheel is engineered for precision glass edge finishing. Designed to meet demanding industrial requirements, it offers reliable material removal and superior surface quality. With a range of available grit sizes and diameters, it is a versatile solution for optical glass, crystal handicrafts, and furniture stone applications.

## Technical Specifications

### Diameter Range

**100 mm**

Minimum Diameter

**175 mm**

Maximum Diameter

### Grit Size Range

40# - 240#

## Product Varieties

### Available Wheel Types

King Kong Wheel, Resin Wheel, 10S Wheel, BK Polishing Wheel, BD Polishing Wheel, 905 Series, Diamond Bit, Polyurethane Pads

## Applications

### Primary Applications

- Optical glass edge grinding
- Glass edge polishing
- Crystal handicraft finishing
- Furniture stone abrasive processing
