

Glass Teapot with Stainless Steel Infuser

This elegant glass teapot features a stainless steel infuser for brewing loose leaf tea. The teapot is constructed from heat-resistant borosilicate glass, allowing for clear visibility of the brewing process.

Product Overview

Elegant Brewing Solution

This glass teapot is designed for the refined tea enthusiast, combining functional borosilicate glass with aesthetic wood-grain accents. It features a removable stainless steel infuser basket, making it perfect for brewing loose leaf tea and herbal infusions with ease. The heat-resistant construction ensures durability, while the clear design allows for full visibility of the brewing process.
