

Glass Tube Liquid Level Gauge

This level gauge allows for easy visual reading and data transmission. It is suitable for high-temperature and high-pressure environments, with a large measuring range of 500-6000mm.

Product Overview

Reliable Liquid Level Monitoring

The Glass Tube Liquid Level Gauge is a robust instrument designed for direct liquid level indication in industrial tanks and vessels. Utilizing the buoyancy principle and magnetic coupling, it features a clear glass tube for easy visual monitoring and a graduated scale for precise measurement. This cost-effective solution is ideal for applications in chemical, petrochemical, and water treatment plants, offering easy installation and long-term performance.

Technical Specifications

Measuring Range	6000 mm
Minimum Measuring Range	500 mm

Key Features

Key Features	Magnetic Flap Design, Buoyancy Principle, Magnetic Coupling, Easy Visual Reading, Data Transmissible, High Temperature Resistance, High Pressure Resistance
--------------	---

Commercial Terms

Warranty	12 Months
Delivery Time	3 days
