Overview

High-Efficiency Glazed Tile Production

This glazed tile forming machine is engineered for high-precision roofing panel production, specifically optimized for the Sri Lankan market. It features an automated PLC control system that ensures consistent output, high safety levels, and ease of operation with minimal staffing requirements. Built for durability and efficiency, it accommodates a variety of material thicknesses to meet diverse project needs.

Technical Specifications

Feeding Coil Width	914 mm
Output Width	760 mm
Compatible Material Thickness	0.4 - 0.8 mm
Raw Material Type	Color Coated Steel Coil

Operation & Control

Control System	PLC Automated Control
Cutting Method	Automatic PLC Control
Staffing Required	1-2 persons

Payment & Terms

Accepted Payment Methods

TT • LC • DP • OA

Payment Terms Policy

- 30% TT in advance, balance before shipment
- Accepts LC (including 100% LC)
- Supports DP and OA terms for eligible regions
