

Glazed Tile Roll Forming Machine

This roll forming machine is designed for manufacturing glazed tiles with a stepped roofing profile. It is equipped with a control system for adjusting parameters such as tile length and forming speed.

Overview

High-Efficiency Glazed Tile Production

This new roll forming machine is engineered for the precise manufacturing of colored steel glazed tiles, ideal for modern roofing applications. It features a robust structure designed for steady performance and smooth operation, ensuring consistent quality in high-volume production environments. With an adjustable control system and reliable output, it provides a dependable solution for professional roofing material production.

Technical Specifications

Production Capacity

8 m/min
Max Speed

Dimensions (L x W x H)	6600 x 1400 x 1300 mm
Weight	3 tons
Power Requirements	5.5kW, 380V, 3-Phase

Machine Details

Key Features

- High-quality output
- Smooth operation
- Reasonable structure
- Steady performance

Certifications	BV Certified
----------------	--------------

Service & Warranty

Service Scope

Overseas Engineering Support

Warranty	12 Months
After-sales Service	Yes
