

Gold-Plated XLR Audio Connector

This is a high-quality XLR connector with gold plating for enhanced conductivity and corrosion resistance. It is used for balanced audio connections, providing superior signal quality and noise rejection in microphones, audio interfaces, and mixers.

Product Overview

Professional Audio Connectivity

This high-quality XLR connector is engineered for professional audio applications requiring superior signal integrity. Featuring a durable metal housing with gold-plated contacts, it offers enhanced conductivity and long-term corrosion resistance. Designed for balanced audio connections, it ensures effective noise rejection in demanding environments like recording studios and live sound setups.

Technical Specifications

Contact Plating

Gold-Plated

Connector Type

XLR

Housing Material

Metal

Key Features

Balanced Audio, Noise Rejection, Corrosion Resistant, Strain Relief

Applications

Common Applications

- Microphones
- Audio Interfaces
- Mixing Consoles
- Professional Audio Equipment
