

Gold Surface Mount Electronic Component

This is a surface mount electronic component with a gold-colored body and metallic top. The top surface features a recessed area with a circular opening, suggesting a connection point.

Product Overview

High-Quality Gold Surface Mount Electronic Component

This surface mount electronic component is designed for high-performance circuit applications, featuring a durable gold-colored finish. Its compact, block-like design ensures reliable integration into various electronic assemblies. With a precision-engineered recessed connection point, it provides consistent electrical connectivity for demanding B2B technical requirements.

Technical Specifications

Surface Finish

Gold

Component Category

Electronic Capacitor / Passive Component

Mounting Type

Surface Mount (SMD)

Compliance and Standards

Industry Standards

RoHS Compliant, Lead-Free
