

Golden Chamfered Electronic Component with Recessed Hole

This electronic component has a golden color and a chamfered edge. It features a square recess on top with a cylindrical hole.

Product Overview

Precision Chamfered Component

This golden-toned component is engineered with a distinct chamfered edge and a precision-recessed square mounting point. Designed for specialized electronic or mechanical applications, it features a central cylindrical aperture for accurate alignment. Its robust construction makes it a reliable choice for integration into complex systems requiring high-quality structural parts.

Physical Characteristics

Finish	Golden
Design Features	Chamfered Edge, Square Recess, Cylindrical Hole
Shape	Rectangular Block
