

# GPS Module

This GPS module is designed for accurate location tracking in a variety of applications. It provides reliable positioning data for navigation and monitoring systems.

## Overview

### Versatile Cooking Solution

This electric contact grill is designed for versatile cooking, making it an essential tool for preparing paninis, sandwiches, and grilled meats. It features a durable stainless steel finish that provides both longevity and a sleek, modern appearance for any kitchen environment. With adjustable temperature control and a floating hinge, it accommodates various food thicknesses for consistent results.
