Overview

Overview of the 16 integrated functions including 4G connectivity, fingerprint verification, and IP67 durability.

Advanced GPS Guard Patrol Management

This GPS-enabled guard tour system is designed for comprehensive security personnel management, integrating 16 specialized functions into a single handheld device. It combines real-time GPS and Beidou dual-mode localization with 4G connectivity to ensure accurate, live tracking and data transmission to management centers. Built for demanding environments, the device features a rugged, IP67-rated exterior and advanced biometric verification for reliable performance in any weather condition.

Core Capabilities

Localization Technology	GPS + Beidou Dual-mode
Connectivity	4G, Real-time Data Upload, Remote Parameter Update
Identity Verification	3rd Generation Living Fingerprint Recognition

Technical Specifications

Ingress Protection

IP67 • Waterproof • Dustproof

Battery Capacity

3400 mAh

Data Transfer Speed

12000 pieces/min

Safety & User Features

Safety Functions

- SOS Emergency Alert
- Impact Detection
- Man-down Alarm
- Pedometer
- Alarm Clock Reminders

Voice & Communication

- 4G HD Voice Calling
- Custom Voice Prompts
- Operating Voice Prompts
