

# GPS Tracker for Vehicle and Asset Monitoring

This GPS tracker is a compact and reliable electronic device designed for precise location tracking. It is ideal for vehicle tracking, asset management, and personal safety, offering seamless integration and user-friendly operation.

## Overview

### Advanced Asset and Vehicle Monitoring

This high-precision GPS tracker offers industry-leading location accuracy of less than 5 meters, ensuring reliable monitoring for vehicles, assets, and personal use. Designed for versatility, the device supports cross-platform integration including iOS, Android, and WAP for real-time tracking from any location. With intelligent warning systems and robust stand-by capabilities, it provides a comprehensive solution for security and fleet management.

## Technical Performance

### Location Accuracy

**5 m**

Maximum Deviation

### Platform Support

- iOS
- Android
- WAP
- PC
- Tablet

### Connectivity

2G, 3G, SIM Card Supported

## Features

### Key Features

Intelligent Warning System • Remote Monitoring • Real-time Alerts • Long Stand-by Time

## Comparison

### Performance Comparison

Feature	This Tracker	Standard GPS
Precision	< 5m	> 500m
Platform Support	Smartphone, Tablet, PC	None
Signal Strength	Strong	Weak
Battery	Long stand-by (Li-ion)	Constant connection required
