

GPS Tribrach Adapter for Surveying

Precision tribrach adapter designed for GPS surveying equipment. It features a robust construction with a circular platform and leveling screws for secure mounting.

Overview

Precision GPS Tribrach Adapter

This high-precision tribrach adapter is engineered specifically for professional GPS surveying equipment. It features a robust, durable construction with a stable circular platform and a central threaded spigot, ensuring secure mounting for GPS receivers and various surveying instruments. Equipped with three precision leveling screws, it allows for accurate horizontal alignment in demanding field conditions.

Technical Specifications

Alignment Features

- Three leveling screws
- Circular platform base

Mounting Type

Central threaded spigot

Compatible Equipment

GPS Receivers, Surveying Instruments, Tripod Mounts
