

Grader Blade End Bit

This grader end bit is suitable for road construction and maintenance. It provides a clean and precise cut, preventing material from spilling off the edge of the blade.

Product Overview

High-Performance Grader End Bit

The 6D1904 grader end bit is a critical component designed for road construction and maintenance. Engineered from high-quality, abrasion-resistant steel, it ensures a clean and precise cut while preventing material spillage. Its robust construction extends the lifespan of your equipment, reducing downtime and improving overall productivity in leveling and grading applications.

Technical Specifications

Primary Applications

- Road construction
- Road maintenance
- Leveling
- Shaping
- Fine grading

Part Number	6D1904
Material Composition	Boron Steel (30MnB), Manganese Steel (16Mn)

Key Features

Key Benefits

Abrasion Resistant • Extended Blade Lifespan • Precision Fit • Reduced Downtime
