

Grader Blade End Bit

This grader end bit is suitable as a motor grader part. It is manufactured from hardened steel for durability and reliable performance in grading and leveling applications.

Product Overview

High-Performance Grader End Bit

This grader end bit is precision-engineered for use with motor grader equipment, ensuring optimal performance in demanding grading and leveling applications. Manufactured from high-quality wear-resistant steel, it is designed to meet or exceed OEM specifications for durability and reliability. The component features a precise fit for easy installation, helping to maintain equipment uptime and operational efficiency.

Technical Specifications

Dimensions

462.4 mm
Length

152 mm
Width

16 mm
Thickness

Part Number

6Y2801

Material & Construction

Material Options

- Boron Steel (30MnB)
- Manganese Steel (16Mn)

Customization

Multiple Colors Available
