Product Overview

Low-Temperature Cross-Flow Grain Dryer

This advanced grain drying system utilizes a low-temperature cross-flow circulation process to ensure high-quality drying for various cereals and rice. Designed with an emphasis on low breakage rates, it features a dedicated winnowing pan and a unique lifting system. The system offers intelligent control with real-time moisture monitoring and remote fault alarms, providing an efficient, environmentally friendly post-harvest solution.

Key Features

Highlights

Low Breakage Rate • Intelligentized Control • High Drying Efficiency • Environmentally Friendly • Uniform Heating

Performance Specifications

Operational Metrics

220 V

Operating Voltage Option 1

380 V

Operating Voltage Option 2

50 Hz

Frequency Option 1

60 Hz

Frequency Option 2

Model Comparison

Model Specifications

Sales ID	Model	Weight
DC100	5HXG-10C	2840
DC125	5HXG-12.5C	3040
DC150	5HXG-15C	3240

Intelligent Features

Automation Capabilities

- Electric control cabinet with remote monitoring
- Automatic shutdown at target moisture
- Imported high-accuracy on-line moisture meter
- Timely fault alarm and notification system
