

Grain Drying System

This high-efficiency grain drying system is engineered for optimal preservation. It features adjustable temperature and airflow control for precise operation and is constructed with durable materials.

Overview

High-Efficiency Grain Drying Solutions

This batch circulating grain dryer is designed for optimal moisture reduction across various grain types. It features a multi-stage drying system with adjustable temperature and airflow controls, ensuring consistent and high-quality output. Built with durable materials, the system is engineered for long-lasting performance, minimal maintenance, and precise operational control.

Technical Specifications

Model Specifications

Model Name	Capacity (m ³)	Batch Processing (t)	Drying Speed (%/h)	Dimensions (L*W*H mm)
5HXG-15	27.06	15	0.4-0.8	4379*2230*9670
5HXG-20	36	20	0.5-1	2376*2566*9556
5HXG-30	54.2	30	0.5-1	5160*3814*12455

Drying Method	Batch Circulating

Key Features

System Highlights

- Multi-stage drying system
- Adjustable temperature control
- Adjustable airflow control
- User-friendly control panel
- Durable construction
