

Granular Material Dispenser with Screw Conveyor

This machine is designed for precise dispensing of granular or powdered materials. It utilizes a screw conveyor for controlled feeding and features a digital control panel for adjusting feed rates.

Overview

High-Efficiency Granular Material Handling

This granular material dispenser features a robust screw conveyor system designed to streamline industrial material handling processes. Engineered to reduce dust and minimize labor intensity, it significantly improves operational efficiency when paired with automated packaging lines. Constructed for durability and hygiene, it is an ideal solution for industries requiring precise dispensing of powders and granules.

Technical Specifications

Conveyor Height

1600 mm

Height

Industry Suitability

Food • Pharmaceutical • Chemical

Suitable Material Types

Granular, Powdered

Features

Key Functional Features

- Stainless steel construction for hygiene
- Integrated weighing system for precision
- Digital control panel for parameter adjustments
- Dust reduction technology
- Compatibility with automated packaging lines
