

# Gravity-Fed Glass T-Cutter

This tool is designed for cutting glass. Its gravity-fed design ensures consistent oil flow to the cutting wheel.

## Product Overview

### Professional Gravity-Fed Glass T-Cutter

This gravity-type glass cutter is engineered specifically for precision cutting of thick glass. It utilizes a high-durability cutting wheel that offers three times the service life of standard models, ensuring consistent performance. With an integrated gravity-fed oil system, it provides smooth and reliable operation for professional glass fabrication tasks.

## Technical Specifications

|                         |                                |
|-------------------------|--------------------------------|
| Cutting Thickness Range | 6-19mm                         |
| Cutting Wheel Material  | High-durability Japanese alloy |
| Packaging               | 6 Pcs/Box                      |

## Model Comparison

### Available Models

| Model       | Max Width (cm) | N.W/G.W (kg) | Dimensions (mm) |
|-------------|----------------|--------------|-----------------|
| BLD(T)-90B  | 90             | 11/14        | 1010X255X210    |
| BLD(T)-120B | 120            | 12/15        | 1300X255X210    |
| BLD(T)-150B | 150            | 13/16        | 1600X255X210    |
| BLD(T)-180B | 180            | 14/18        | 1900X255X210    |

## Key Features

|                    |   |
|--------------------|---|
| Product Highlights | Gravity-fed oil system, Thick glass compatible, Extended service life, Adjustable scale |
|--------------------|---|
