

Gravity-Fed Water Filter Dispenser

This water purifier dispenser is designed for household use, delivering filtered water on demand. It features a multi-stage filtration system within a durable, transparent plastic casing.

Overview

Gravity-Fed Clean Water Solution

This gravity-fed water purifier dispenser provides a reliable and cost-effective solution for household clean drinking water. Utilizing a multi-stage filtration system with ceramic and activated carbon components, it effectively removes impurities and improves taste without requiring electricity. The durable, transparent design allows for easy monitoring of water levels and simple maintenance for long-term use.

Key Features

Performance Highlights

0 W

Electricity Required

Filtration System

Filter Components

Ceramic Filter, Activated Carbon, Multi-stage Filtration

Design & Construction

Chamber Configuration

- Upper chamber for unfiltered water
- Lower chamber for dispensing filtered water

Operation Type

Gravity-fed

Casing Material

Durable transparent plastic

Usage & Maintenance

Primary Application

Household • Indoor Use

Maintenance Benefits

- Easy to assemble
- Simple maintenance
- Cost-effective operation
